

The Science behind the Fall

This is the most important chapter to this book so please pay attention. Here we discuss not only the assumptions to the theory and scripture interpretation of this book but also the science that support those assumptions. The objective is to give the reader insight into reality of life both before and after the flood up unto the present from the creator's perspective. It answers some tough questions about the behavior of God particularly in the Old Testament. It also has some tough implication for current affairs and the destiny of humanity.

The first assumption is that DNA is vital to the formation of an eternal Soul. There is not much scientific evidence of this relationship other than perhaps unexplained Ghost phenomenon and "EM auroras" surrounding the physical body. Therefore, this assumption finds its bases in scripture and Logic.

Gen 2:7 And the LORD God formed man *of* the dust of the ground, and breathed into his nostrils the breath of life; and man became a living soul.

The word here **n@shamah {nesh-aw-maw'}** means "Spirit of life" with the obvious implication this spirit of life came from God. This improves our understanding of what God meant by creating humanity "*...in the image of God created he him; male and female created he them.*" (Gen 1:27) The breath of life from God, ie the image of God is the same in all of us, male or female. However, DNA, i.e. the programmed proteins made from the elements of the earth, form this spirit into a unique "living soul".

This scripture can be formulized as follows:

Living Soul = Spirit of God + f(DNA + Time)

Which can be reduced to:

Spirit of God + life [Life = DNA + Time].

So as long as Spirit is attached to DNA it is a “living Soul”. The results of $f(\text{DNA} + \text{Time})$ can be found in psychology books. It is called Identity. Identity is who we are; our morals, beliefs, likes, dislikes etc. that are formed over time. It can be formulated like this:

Identity = f(DNA + Time) – DNA.

It is no surprise then that the bible identifies another soul after life called the eternal soul. This also can be formulized as follows:

Eternal Soul = Spirit of God + f(DNA + time) - DNA

which also can be reduced to

Eternal Soul = Spirit of God + Identity

Thus if you are really paying attention we have:

The Soul = Image of God filled with your Identity.

Notice how vital and intricate part DNA plays in the formation of your Soul. DNA can be extracted after the formation of the soul (i.e. death). Yet the soul cannot be formed without it. This is the reality of Life as God made it and the Bible teaches it.

Assumption two is a bit more speculative. The full collection of genes needed to produce a today's human population [the human Genome by some standards] is not the same as was created by God. That is to say that there has been an interjection of genetic materials since the creation of Adam

and Eve. (We secondarily assume that this material did not come from God!)

Again we must look to scripture and logic to substantiate this assumption. Science just cannot [a least as far as I know] substantiate mitochondrial Eve's nuclear DNA makeup before the fall. The major verse for this assumption is the banner verse for this book:

Gen 3:14 And the LORD God said unto the serpent, Because thou hast done this, thou art cursed above all cattle, and above every beast of the field; upon thy belly shalt thou go, and dust shalt thou eat all the days of thy life:

Gen 3:15 And I will put enmity between thee and the woman, and between thy seed and her seed; it shall bruise thy head, and thou shalt bruise his heel.

This verse 15 without doubt spoken against the serpent or Satan clearly differentiates between 'thy seed' (Satan's seed) and 'Her seed' (Eve seed). We can therefore conclude that there was a difference in the DNA of the children, the paternal twins, Eve was to bear. Also through the science of Genetics we can conclude that after several generations there would be a different human Genome than the one God created. The DNA pool of humanity would be a mix of 'her seed' and 'thy seed'.

Next important verse that drives the assumption is found in Gen 6:4;

*Gen 6:4 There were giants in the earth in those days; and also after that, **when the sons of God came in unto the daughters of men, and they bare children to them, the***

same became mighty men which were of old, men of renown.

Here we discover that generations after God made humanity that a foreign DNA entered into the human Genome through the “sons of God”. The verse itself bares this conclusion because the union with the ‘sons of God’ with the ‘daughters of Men’ bore Nephilim or “of the fallen”, who became the gibor, the god’s of old. We also have confirmation of this event in the New Testament, the angels who “left their first estate” ().

In order to mate with women the change estate of these fallen angles must have been extra terrestrial (not of earth) DNA. This is the only way to account for the Gigantism and other changes in their offspring reported by ancient literature and the Bible. We can therefore safely conclude that their presences injected new DNA into the human Genome that was not of God. (At least directly)

Confirming evidence comes from the Dead Sea Scrolls as well. The fourth scroll called the Genesis Apocryphon, also indicates that pre-diluvium world was ruled by physical fallen Angels, extra terrestrial in nature. Most of the scroll is unreadable. Nonetheless, some paragraphs can be understood although some words are missing. This paragraph comes from column two:

*I thought, in my heart, that **the conception was the work of the Watchers the pregnancy of the Holy Ones and that it belonged to the Giants**... and my heart was upset by this... I, Lamech, turned to my wife Bitenosh and said... **Swear to me by the Most High, Great Lord, King of the Universe...the sons of heavens, that you will truthfully tell***

*me everything, if... You will tell me without lies... Then Bitenosh, my wife spoke harshly and she cried... and said: Oh my brother and lord! Remember my pleasure... the time of love, gasping for breath. I will tell you everything truthfully... and then my heart began to ache... When Bitenosh realized my mood had changed...Then she withheld her anger and said to me: O my lord and brother! Remember my pleasure. I swear to you by the Great Holy One, the King of the heavens... **That this seed, pregnancy, and planting of fruit comes from you and not a stranger, Watcher, or son of the heaven...***

This paragraph of scroll four makes it is unmistakable that the “Sons of God” in genesis and the “fallen Angels” in the New Testament should be considered physical manifestations that were adding to the DNA genome of humanity. Lamech’s lament clearly indicates that men in that epoch were, for some reason, not in control of their wives. The paragraph goes on to say that Lamech inquired all the way up to Enoch to find out if his wife had been compromised. This was a sad state of affairs to be sure.

These two assumptions then, that DNA is intimately connected to the development of soul and that the original DNA created by God has been compromised forming ungodly souls has solid Biblical and Ancient literature foundation. I believe science can fill in the Gaps and explain the reality faced by God and his answer to the situation.

Gregory Mendel greatest contribution to science was the discovery of genetic inheritance and trait expression. This is what we call today genotype and phenotype of genes. Although Mendel of course never actually saw or named the gene he did discover that inheritance follows the laws of

probability and one major characteristic of the genes, manifest and latent. (Popularly known as dominance and recessive traits) He also predicted the discovery of the gene.

Mendel used probability charts very similar to the ones I will be using here to explain what happen in the antediluvian world and the Garden of Eden. While these charts are not the most accurate they are the best to explain the principle involved. The specifics unfortunately get rather complex. However, they do not materially alter the fundamental Mendilian principle.

Chart 1 represents the Human genome at the time God created Adam and Eve and what happen to it after the fall. The lower case 'e' represents the original DNA/soul relationship of the genes in that DNA. I will refer to these as the Eden genes. These are the genes of purity and innocence displayed by Adam and Eve before the serpent deceived them into partaking of the tree of knowledge of Good and Evil.

The next row, after the fall, represents what happen to Adam and Eve after they ate from the Tree of knowledge of Good and Evil. Note that one of the genes is now identified with an 's' representing the sin nature of the flesh. Again this is simplistic way or represents a complex introduction of DNA that changed Adam and Eve into more sophisticated and 'Modern' human.

They became humans whose souls could not handle the sin nature. They therefore had to be kicked out of the Garden of Eden "lest he put forth his hand, and take also of the tree of life, and eat, and live forever:" (gen 3:22) Just as the tree of life would have affected Adam and Eve's DNA so the Tree of knowledge affect their DNA but for the worse. God could not abide 'little Satans' living forever. (For more information please read my first book *'The Deliberate Design of Destiny'*)

I like to use the movie Forrest Gump to get some idea of the difference between humans before and after the fall. Forrest Gump, although considered mentally slow did in fact become a millionaire and famous through his faith in God, honesty and family. Yet, those around him who were “smarter”, their lives fell apart. In a similar way Adam and Eve had become too smart for their souls. (Even as humanity is today with its wars, environment destruction and the rest.)

Finally the box below in the chart represents the possible combination of offspring from Adam and Eve after the Fall. It clearly shows why God addressed Cain in Eve's womb as 'thy seed', the seed of Satan and Abel as 'her seed', the seed of Eve. Abel still had the 'e' gene while Cain had both genes of the sin nature, the 's' gene. Cain represented with 'ss' was completely overtaken by the sin nature when he killed Abel. Abel's seed was replaced by Seth.

It is important to note that this chart also shows why God said 'Her seed' will fatally wound Satan's head and not 'Adam's seed'. Notice that the only possible 'ee' combination, the only combination without sin will only appear in a future female generation not the male. This is because DNA changing properties of the Tree of Knowledge changed the Y chromosome in Adam.

We now have a working model that fits the events information and prophecy of the three verses of Genesis. We can now postulate succeeding generations using Mendel's laws of inheritance probability. Chart 2 shows just how quickly the sin nature permeates the human genome. Look at the 8th generation.

It is important to note that the 'es' gene and even the 'ss' gene do not represent unsalvageable souls. As the Lord told Cain "If thou doest well, shalt thou not be accepted?" (Gen 4:7) This is why I believe Cain was not executed after murdering Abel. One the Law had not been given yet and two, Cain soul was salvageable. (Although I do not believe he ever found peace with God.)

Our model now show that the 'ee' gene, the combination without the sin nature, has a 1/100000000 possibility after the 8th generation. That was not good enough for the Evil one. He knew God. He needed to destroy the seed of the woman. However that was not possible physically as God would not allow it. (See the book of Job for confirmation on that)

His only other possibility was to introduce DNA that was not of God and therefore a soul logically not salvageable. His plan was to replace humanity with a hybrid race of gods and humans. The book of Enoch and other Ancient literature talk of how the 'gods of heaven' where temped by the beauty and pleasure of human women to procreate with them. Hercules, Cyclops, the Titans, Gilgamesh and many more were hybrids of Gods and men. Just like the Bible says they were 'mighty men' and 'giants' in those days.

It was this Kingdom, these empires, this culture where the god's ruled, taking whatever they willed that is reflected in Chart 4, our Mendel model. This plan of Satan's to forcibly replace the genetics of God with hybrid souls. The same genetic principle applies here except now there is a full NN (Nephilim genetics) genetics imprinting itself on the human genome.

Mendel discovered as our model reflects that we all have a 50/50 chance of inheriting one of our parents gene. Probability studies shows that to inherit a set of genes from a particular parent we multiply the number of genes by the probability. For example 4 gene set = $\frac{1}{2} * \frac{1}{2} * \frac{1}{2} * \frac{1}{2} = 1/32$ chance of inheriting the set of independent traits.

Duplication of the entire gene set of one parent therefore is all but impossible. The larger the gene set the less likely it is to appear in later generation. At the same time individual genes and their traits are quickly diffused into the human genome.

Inheritance becomes even more complicated by Mendel's discovery that trait manifestation can be latent. A gene can be inherited but stay hidden for many generations. Again its expression depends on probability of matching another latent gene.

Mendel's discovery of dominance and recessive traits has been determined to be only a small part of the complex gene expression process in mammals. There are several other patterns of expression: incomplete dominance, co-dominance, expressive, penetration and nurture.

It is these other patterns, particularly nurture or environmental that are most important to understand God and his treatment and plan for humanity. These other patterns show that gene set expression is not always a matter of 'on' or 'off'. They can (for lack of better word) "fight" for expression. Genes can be influential like partial or co-dominance. Genes can also be environmentally activated.

In the study of genetic diseases we find all of these types of expression or phenotypes as they are called. For example, geneticists believe that the cancer gene() is activated by a

irritant such as nicotine or stress. Another example is the () gene for alzheimer's disease. The severity of its manifestation is related to other gene factors. Indeed then phenotype predictions are rather like winning the lottery, particularly in inheritance of complex gene sets.

This unpredictable and complex process of meiosis and genetic expression explains a lot about biblical statements and behavior. Understanding the 5 genotypes in our Mendel model, 'SN', 'EN', 'SS', 'ES', 'EE' and their phenotypes helps us to understand God's perspective on humanity.

In the first two genotypes in our Mendel model, the ones that contain the 'N' gene represent genetics from the Fallen ones. We are face with the fact that there are souls that are born bad, unsalvageable. Souls not made by God but are a corruption of God's creation.

This explains why God "hate Esau even before he was born" (). The Bible also declares that God destroyed the old world that was with a flood because it repented him of having made man, The corruption of his creation was that great.

The Bible also tells us that God gave orders that every man, woman and child be killed of the tribes of Canaan. () Finally even Jesus tells the high priests of the temple "you are from beneath I am from Above....You will die in you sins".

I believe this behavior can only be explained by the unsalvageable, bad to the core, genetics of the fallen one. It is so significant that Jesus called these "high priest" of Abraham, sons of the devil (). Jesus clearly indicates that these are souls of the damned. They are soldiers of the enemy that cannot hear God. ()

The next 2 genotypes contain the 'S' gene which represents the genetic change, the enlightenment if you will of the tree of knowledge. This genetics has co-dominance in the human population. The Bible declares that all have sinned and come short of the glory of God(). So all humanity has the intelligence to do great and wonderful things in God's creation but does not have the soul genetic or will to control that intelligence.

The gene set then works like a genetic disease similar to gigantism which over develops the body such that the heart and other organs can't handle it. Such people like the famous wrestler Andre the Giant die early in life because of it. In our model, the case of the 'S' gene over develops our intellect such that our souls can't handle it. All humanity has gigantism of the soul.

History and civilization then reflect this conflict in life. Indeed, as my first book reveals if God had not interfered several times in history mankind, humanity would be hopelessly lost. He would be civilized but barbarian. Humanity would be the perfect puppet for the Evil one.

The final genotype is the rare 'ee' genotype, the original genotype of Eden. The 'seed of the woman' of Genesis 3:15. These people will not be known for their intelligence but known for their compassion and understanding of God.

This gene set is large and probably recessive in nature becoming rarer, generation after generation. Probably this gene set would become impossible at some point in time. None the less it was the set that God protected at least up until the Virgin Mary; fulfilling the great prophecy that Eve's seed would fatally wound Satan's head.

The reality of the human genome that God faces is exactly like the parable of the tares of the field (Mat 13:37) that we have studied. The field or human genome has indeed be sown with tares, the tares being the foreign genetic material that overwhelms the soul. In its purest form it creates a soul of a “son of the devil”. **In others this genetic disease of the soul may take a lifetime to manifest.**

The ‘S’ gene works like a genetic birth defect that humanity suffer with from the day they are born. Without special intervention the defect will eventually kill the soul. From God’s eternal perspective then we are already dead.

Mat 8:21 And another of his disciples said unto him, Lord, suffer me first to go and bury my father.

Mat 8:22 But Jesus said unto him, Follow me; and let the dead bury their dead.

This is reason Jesus tells this potential disciple who wants to wait until his parents are dead to “let the dead bury the dead...”() God knows that by himself no one can overcome his genetic birth defect. In the fallen state human souls are just too weak. Virtually then we are indeed “dead in our sins”().

However there is hope. Hope for the dying. Jesus tells Nicodemus, “that which is born flesh is flesh and that which is born of the Spirit is spirit.” Again Jesus is emphasizing that there is no salvation in the DNA of humanity, born flesh is flesh. No philosophy, no religion, no government, no birth or ancestry can save a man from his genetic defect. His flesh is just too weak. The corruption of the human genome is just too great.

Thankfully Jesus introduces Nicodemus to the concept of being “born again” that is “born of Spirit”. If we are not “born of this Spirit” says Jesus “we shall not ever see the Kingdom of God”. Clearly there is something about being born again that

strengthens a person's spirit to overcome or at least make it ineffective, our genetic defect.

A study of the words of Jesus and Paul reveals that being born again works similar a prosthetic support for the soul. Allowing the Holy Spirit to dwell in you overcomes your genetic defect. The Holy Spirit helps you open the eyes and the ears of the soul that were apparently blinded by the genetic defect. Thus you begin to understand the "mystery", "the truth", basically the purpose of life. () The rebellion and blindness to the reality of God is over.

A reconciliation () takes place that overcomes the rebellion, ignorance and survival of the fittest instincts and drives of our flesh. According to scriptural writing we are reconciled unto God from the divorce that happened in the Garden of Eden.

Though we are reconciled everything is not back to the way it was. Our flesh remains weak against the pressure, pleasures and temptations of this world. We still live in the darkness of this world. Even Jesus, in his holy state, in the darkness and agony of the Garden was sweating blood in the face of death. He cries out to God "The spirit is willing but the flesh is weak". (). Thank God he found the strength. Paul explains this in more detail as it applies to human beings:

Romans 7

Paul here is explaining that being born again means that we no longer willingly serve the flesh. He says with the "mind we serve the law of God". That is to say that we no longer purposely or premeditatedly sin but in weakness our flesh we "serves the law of sin". His wonderful answer to the question who shall deliver me from the "body of this death" is Jesus Christ!

Paul realized that Jesus Christ save us through justification (). Our salvation is one of justification like that of justifiable homicide. Justifiable homicide is still homicide. However the circumstances justify using violence and taking a life in order to save our own life or someone else. [It is interesting to note that justifiable homicide can never be premeditated]

In like manner, being “born again” in the spirit we no longer premeditatedly or willingly sin but seek to live our life according to the law, love and word of God. We sin therefore, only in weakness of the flesh. Let’s face it. DNA even with the help of the Holy Spirit is just too weak to handle the environment or darkness of this world in every minute of every day. Thank God we are justified through faith:

[Rom 5:1](#) Therefore being justified by faith, we have peace with God through our Lord Jesus Christ:

[Rom 8:30](#) Moreover whom he did predestinate, them he also called: and whom he called, them he also justified: and whom he justified, them he also glorified.

The whole theology of justification is beyond the scope of this book. The bottom line though is: Faith in Jesus Christ turns around the direction of our life brought on by our DNA, reversing Satan’s work. While our Soul is cured (strengthened) our bodies are not. God is justified in saving our souls but letting our bodies die.

Thus Jesus Christ delivered a fatal blow to Satan. By strengthening our soul through the Holy Spirit he opens our eyes to the Kingdom of God, understanding the righteousness of God. Exactly what God wanted Adam and Eve to understand in the Garden of Eden and the ability Satan took away.

We have now covered the scientific, biblical and logical basis for this theory on Genetics of the fall. It is time now to conclude this chapter with a few observations using Chart xx

that will help guide us as we compare the theory to the observable evidence contain in the Bible, archeology and history.

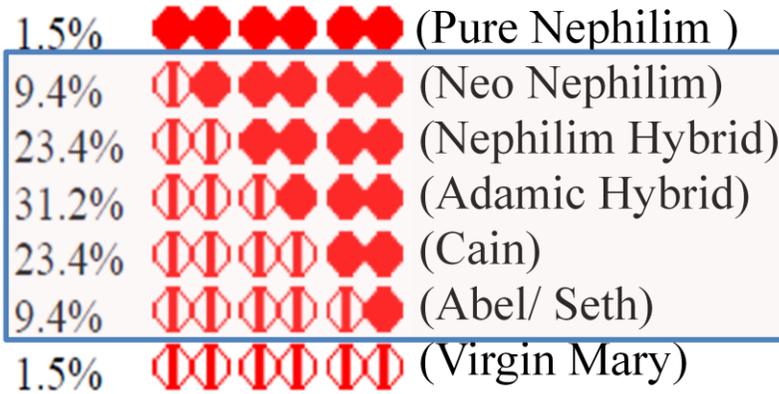

Chart 6: possible distribution of polygenic foreign DNA in the human genome (red = foreign genes: white= Eden genes). The box contains the probable distribution after Jesus the Christ.

This genetic model of the fall indicates that a small percentage of the population could be considered Nephilim (In this case 9.4%) and over 90% with some chance of salvation. It also indicates that over 90% of the population would be heavily burden by the influence of the ungodly DNA. (In this case Cain and above) Thus confirming Jesus' words 'wide is the path that leads to destruction and narrow is the way unto salvation.'()

This genetic model is also confirmed by recent studiesⁱ on the genetics of violence which identify the MAOA gene as a "Warrior Gene". Low-activity MAOA is much more frequent (approaching two-thirds of people) in some populations that have a history of warfare. Low-activity MAOA gene has even been successfully used to keep a wife murder **Bradely Waldroup from the death penalty. It is not to hard then to postulate that ungodly DNA is largely responsible for the violent, criminal and ungodly aspects of history and life.**

The ungodly DNA is acknowledged in the Bible as coming from the “tree of knowledge” and “fallen angels”. It would most likely manifest not only in violence but also as a greater degree of “intelligence” or “knowledge”. The more ungodly DNA then would tend to develop into an abusive ruling elite. (the 9.4%) Elite that uses the “inferiors” as soldier and slaves to produce their empires and lifestyles.

The elite of the elite would be the Neo-Nephilims, the Empire builders we will be following in the rest of this book. I have already introduced them as the ‘Kosmocratores’, the puppet masters of Ephesians 6:12.

Perhaps the best name for them is slave masters. They have been enslaving mankind through violence, technology, religions and finance since even before the beginning of recorded history. They are the enemy that God has been fighting throughout history. They are the builders of the ancient world order, the old world order and the new world order. The order of the Antichrists!

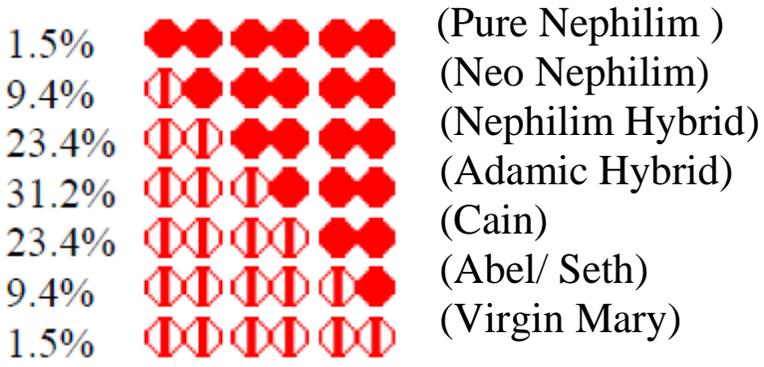

Important note: This model (and this book for that matter) does not provide a base for prejudice and racism as some might use it in ignorance and or on purpose. The important genetic traits of fall that affect the soul are not physically manifested similar to the MAOA gene. What more there is no and never will be any DNA pattern to compare against.

Jesus told the angels that it was impossible to tell the seeds apart. Jesus also left strict instruction “judge not lest y be judged” (). Clearly the Christian cannot judge particularly on outward appearance.

Jesus’ last command was to go unto all nations baptizing in the name of the Father, the Son and Holy Ghost (). Clearly then

good seed is among all nations. Paul says there is neither Greek nor Jew, male or female in the eyes of God. ()

Genetics confirms that gene manifestation can appear to come out of nowhere. For example: two perfectly normal people can have a midget child and two midget people can have a perfectly normal child. So it is that the ungodly DNA which does not manifest in outward appearance can be found in all the races and nations of the earth. Therefore both scientifically and spiritually this model or this book should never be used as a basis for racism, genocide or the like.
